

# Walmart Economics Internship

The Walmart Economics team is hiring juniors for summer 2025 internships. Join us in applying economics to analyze causal effects, design experiments, and drive strategy!

## Experiment Design

Design, analyze, and execute experiments to evaluate product UX, and strategy changes

## Data Science

Utilize Walmart's vast data to understand and improve our operations

## Business Strategy

Guide decision-making with rigorous science and effective collaboration

## Walmart Economics

## Collaboration

Partner with tech, business, and product teams to implement our findings

## Causal Inference

Leverage the latest in econometrics and statistics to evaluate quasi-experimental changes

## Behavioral Economics

Apply the behavioral economics literature to inform user experience design

**We apply these methods to problems across Walmart - including pricing, memberships, labor, sustainability, & more!**

### Our Ideal Candidate is:

- A third-year undergraduate majoring in a quantitative field (e.g., Econ, Math, Stats, CS, Engineering)
- Experienced with analyzing large datasets, experimentation, or causal inference (ideally coding in SQL, R, or Python)
- Passionate about Economics or Academic Research
- Curious, collaborative, and eager to tackle hard problems

Team members have gone on to Economics PhD programs and roles in data science, product management, and business
